Managing non-cash payment transactions should be simple. With RDM's payment processing solutions, financial institutions can offer corporations a single-source payment network that's intuitive, customized to their needs, and easy to use.

## Remote Deposit Capture

Our solution makes it easy to electronically deposit checks and all associated information. From simple to complex transaction processing (including quick deposits or transactions with a high volume of checks and remittances), the solution is customizable to meet the needs of your customers.

RDM's remote deposit capture solution is now in its fourth generation and is one of the most advanced available in the industry.

*By implementing an RDC solution, financial institutions can:*

- Expand market share
- Appeal to a wider range of customers
- Offer sophisticated, flexible payment processing solutions
- Increase revenue with custom workflows

### RDM's mobile RDC solution:

- Captures checks, remittances, general documents and transaction-related data
- Can be customized, branded and deployed quickly
- Requires minimal training

## Mobile Remote Deposit Capture

RDM's mobile RDC solution allows your customers the ability to electronically deposit checks at their location(s) using a tablet or smart phone. Not only is it easy to use, it takes less than a minute to deposit a check.

Why is mobile RDC important?

*Financial institutions can:*

- Expand market share
- Appeal to a wider range of customers
- Offer sophisticated, flexible payment processing solutions
- Increase revenue with custom workflows

*Corporate customers can:*

- Deposit securely and conveniently 24/7 with a tablet or smartphone
- Configure mobile workflows to suit their needs
- Consolidate banking relationships

## Remittance Processing

Businesses of all types and sizes, including financial institutions and corporations, handle remittance data on a daily basis. Having the ability to process check and coupon documents accurately and in a timely fashion is an integral part of maintaining a healthy cash flow.

*By implementing a remittance processing solution your organization can:*

- Reduce payment float time and increase cash flow
- Improve customer service with access to payments data
- Generate more recurring revenue and reduce operating costs

## Digital Imaging Solutions

RDM's check scanners enable users to efficiently and affordably process checks or remittance documents. Because of the compact and multifunctional design, that includes MSR modems and receipt printers, users can eliminate the need for multiple payment devices.

Proven to have one of the lowest total costs of ownership in the industry, our check scanners offer performance and reliability along with more than 25 years of industry expertise in MICR and imaging technology.

A winning combination of superior digital imaging products and software, along with strong partnerships, makes RDM the leading end-to-end solutions provider for financial institutions and businesses of all sizes.

## Professional Services

RDM's Professional Services is committed to helping you achieve successful implementation and deployment of your solution so you can maximize your investment.

No matter what the size of your organization, RDM's Professional Services team is here to help meet your business needs and maximize your investment.
